Master

Slave

Wall plate
not included

Range		
Master	DGOZ-MOSW-M-RE	
Slave	DGOZ-MOSW-S-RE	

Overview

Modular digital rotary switches with integral push switch for the RAPIX Lighting Control System which fit in standard Australian wall plate apertures.

The Rotary Switches are available as Masters or Slaves. Master Rotary Switches connect to a RAPIX eHub. Each Master Rotary Switch is capable of being connected to one Slave Rotary Switch.

Rotary Switches can be configured in RAPIX software to perform a wide range of functions and each module (Masters and Slaves) includes two software configurable LED indicator colours, white and warm white

Features

Two configurable LED colours, white and amber

Fits standard Australian wall plate apertures

Master RAPIX modular switches connect to the eHub and are powered via the eHub

Slave RAPIX modular switches connect to a master and are powered via the master

Typical switch functions include

- Toggle on / off
- Fade lights up or down
- Start or cancel a timer
- Recall a fixed level
- Toggle between off and the current level
- Issue a scene

All commissioning is carried on via Diginet RAPIX software suite. The configuration is downloaded to the eHub via a DALI line.

Typical Applications

Commercial buildings
Boardrooms

Education facilities
Residential buildings
Connecting to the eHub

Each master RAPIX modular switch is supplied with the following patch leads.

Modular switch range – Rotary Switch

eHub to RJ-45 patch lead

Master RAPIX modular switch to RJ-45 patch lead

These two patch leads are used in conjunction with standard Cat5/Cat5e cable and RJ-45 connectors to connect master RAPIX modular switches in the eHub.   See the pictures and diagram on the following page.

Connecting masters to slaves

Slave RAPIX modular switches connect directly to masters. Slaves have an integrated flying lead with a male connector. Masters have matching female sockets.

## Specifications
Parameter	Specification		
Available types	Push Button Master Rocker Master Rotary Master	Push Button Slave Rocker Slave Rotary Slave	
LED colours	Master and slave RAPIX modular switches include both white and amber LED indicators. The operation of these LEDs and LED colours is configured in the RAPIX software tools		
Number of slaves which can be connected to a master	**Master switch type**	**Slave push / rocker switches**	**Slave rotary switches**
	Push Button	Up to 5	N/A
	Rocker	Up to 5	N/A
	Rotary	N/A	1
Maximum distance between a master and eHub	100m		
Maximum distance between a master and a connected slave	100mm (via pre-terminated slave cable)		
IP Rating	IP20		
Approvals	CE RoHS COMPLIANT
